EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with E. John Fain on November 30, 2007.

The application has been amended as follows:

Claim 1 line 5, delete "part" after "information".

Claim 1 line 6, delete "part" after "coefficients".

Claim 1 line 12, delete "part" after "coefficients".

Claim 1 line 12, delete "of" after "the".

Claim 1, line 12, insert -- within -- after "metadata".

Claim 12, line 9, delete "part" after "information".

Claim 12, line 9, delete "part" after "coefficient".

Claim 12, line 11, delete "part" after "coefficient".

Claim 12, line 14, delete "part" after "coefficient".

Claim 20, line 7, delete "part" after "information".

Claim 20, line 7, delete "part" after "coefficients".

Claim 20, line 9, delete "part" after "coefficients".

Allowable Subject Matter

1. **Claims 1-21** allowed.
2. The following is an examiner's statement of reasons for allowance:

3. **Claims 1, 12, 17, and 20** are allowed because the closest prior art, Wolfgang (US Patent Application 6,609,223), fails to anticipate or render obvious the concept of improving the probability of failure when broadcasting data in combination, by linearly combining the linear coefficients with metadata of incoming packets into a outgoing packet, then inserting into the outgoing packet metadata portion, linear combination coefficients of the metadata within the synchronized incoming packets and linear combination coefficients that identify the data, in combination with all other limitations in the claim (s) as defined by applicant.

Wolfgang discloses that incoming source packets is encoded with wildcard packets (metadata), then data and metadata are linearly combined and includes synchronization information, but does not create a new metadata portion within the outgoing packet of the linearly combined coefficients metadata of the incoming source packets.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
